# LUCKY CRAFT TOP WATER

# SAMMY

The rounded body shape produces a smooth "walking the dog" action to satisfy all users from beginners to professionals. This curve controls the dive when landing so that bass are not frightened off even in tough conditions and a slightly upright floating position has been devised so that a lot of action can be produced within a short distance. The Sammy is the number one choice of people throughout the world and its' continued success is produced from quality materials, its fishability and its catch rate that are second to none.

Lucky Craft has taken the Sammy, one of its most popular topwater baits, and re-designed it to create the Lucky Craft Sammy 105. With the addition of a single knocker, fish will be enticed and called to the surface in a new way. Also, the addition of a third treble hook will increase the chance for hook-up success.

Sammy 65 - 2-1/2" (65mm) 7/32oz (5.8g)  
 Sammy 85 - 3-1/4" (85mm) 7/16oz (12.6g)  
 Sammy 100 - 4" (98.5mm) 1/2oz (13.6g)  
 Sammy 115 - 4-1/2" (115mm) 5/8oz (18.5g)  
 Sammy 128 - 5" (128mm) 1oz (28.0g)

Wood Sammy 100 - 4" (100mm) 1/2oz (20.0g)  
 Live Sammy 120 - 4-3/4" (120mm) 1oz (24.5g)

Sammy 105 ~Single Knocker~ - 4-1/8" (105mm) 3/8oz (11.2g)

滑らかなWalk The Dogアクションを演出するその曲線的なボディシェイプは、初心者から大人まで全ての使い、手を満足させる形状だ。その曲線は、タフなコンディションでもバスに警戒心を与えないよう着水時のダイブを抑制させ、少し立ち気味な浮き姿勢は、短い移動距離でより多くのアクションを演出できるよう工夫されている。サミーが全世界で一番多くの人に愛され、使い続けられているのもこの使い易さと、釣れ易さが究極に高い次元で融合されている事に他ならない。

Considéré comme la référence en matière de leurre de surface, le Sammy est un stickbait qui se démarque de ses concurrents par ses qualités de nage. Contrairement aux autres stickbaits du marché, le Sammy est très facile à animer et vous pourrez lui faire exécuter sans difficulté la fameuse nage en "walking the dog". Le Sammy excelle dans les conditions de pêche difficiles (surface de l'eau calme, peu de vent ou mer "d'huile"). Sa finition hyper réaliste fait que, même immobile, il prend du poisson. L'équilibre du Sammy permet également des lancers longs et précis pour atteindre les postes les plus éloignés avec le maximum de discrétion. Capable d'une grande polyvalence au niveau de l'action, vous ferez du Sammy une arme d'une efficacité redoutable sur tous les carnassiers d'eau douce et de mer.

Округленный корпус обеспечивает плавное движение, напоминающее выгуливание пса на поводке, которого будет достаточно как новичкам, так и профессионалам. Эта кривая позволяет полностью контролировать погружение даже в самых сложных условиях, поэтому окунь не пугается. К тому же приманка имеет смещенное к вертикали плавающее положение, что позволяет управлять ей в полном объеме даже на близком расстоянии. Sammy — выбор номер один рыбаков по всему миру благодаря высококачественным материалам, удобству и неизменно высокому улову.

El cuerpo con forma redonda produce una acción única de "pasar al perro" para satisfacer a todos los pescadores desde principiantes hasta profesionales. Esta curva controla la inmersión al descender para que los basses no se alejen asustados, aún en condiciones difíciles. La posición ligeramente vertical se ha diseñado para producir mayor acción a corta distancia. Sammy es la primera elección de los pescadores en todo mundo y su éxito continuo surge de la calidad de materiales, su capacidad de pesca y su índice de pesca a superficie que son las mejores.

“Walking the Dog” ACTION

CUP

POSTURE

BODY SHAPE

Not only does the Lucky Craft Sammy have incredible 'Walk the Dog' action, but the cup-shaped face allows the bait to spit a tiny amount of water as it moves across the surface. Called the 'Miracle Bait' by anglers across the country, the Sammy resembles a baitfish swimming across the surface and will greatly increase an angler's hook-up percentage.

Another very special characteristic of the Sammy is the standing posture. Sometimes bass aren't stimulated by the 'Walk the Dog' action alone so the standing posture of the Sammy allows for a more realistic look in the water, which will attract more strikes.

Body shape of a bait is important to catching fish. The banana-shaped body of the Sammy enhances the realistic look of the bait and, combined with the posture and side-to-side action, is hard for bass to resist.

## GUNFISH

## G-SPLASH & T-SPLASH

The Gunfish is the best "pencil popper" like lure for capturing highly active bass from early summer to late fall. With its highly technical gravity tungsten resin weight, an unparalleled casting distance and a wide-ranging area using wide skating and a variety of actions, active bass cannot resist it. Wide skating produces an appealing splashing sound that allows baitfish to boil and schooling bass to be thrown into confusion. The strong backwash that is produced from the large skating action has the drawing power to attract bass from as much as 10 feet below the surface.

高比重タンクステン樹脂ウエイトの搭載により、圧倒的な飛距離にて広範囲のエリアをワイドなスクーティングと多彩なサブアクションにてアクティブなバスを次々と誘引し、初夏から晩秋にかけての活性の高いバスを攻略するには一番のペンシルポッパーがこのガンフィッシュ。ワイドなスクーティングと同時にアピールするそのスプラッシュ音は、ペイトファッシュのボイルを演出させ、スクーリング時のバス達を狂わせる。その大きなスクーティングから飛び出される大きな引き波は、サーフエスから0.7フィートも下に息をするバスをも引き寄せる力(Drawing Power)を持っている。

Le corps fuselé et la bouche en coupelle font du Gunfish un stickbait hors du commun. Par rapport au Sammy, le Gunfish « poppe » lors de sa nage en « walking the dog ». Le Gunfish est également plus stable sur l'eau et excelle quand les conditions de pêche sont venteuses et que la surface de l'eau est agitée de vagueslettes. Grâce à son système d'équilibre constitué de billes en alliage de résine et de tungstène, le Gunfish se lance comme une bille et permet de couvrir de vastes étendues d'eau : c'est le stickbait de prospection par excellence. Un outil indispensable dans votre boîte lorsque vous devez localiser les poissons sur de vastes étendues d'eau.

Gunfish — это лучшая вертикальная блесна для ловли высокоактивного окуня в период с начала лета по конец осени. Высокоактивному окуню ни за что не устоять перед этой высокотехнологичной приманкой с грузом из вольфрама и смолы, забрасываемой на самое дальнее расстояние и обеспечивающей охват широкой площади благодаря размашистому скольжению и разнообразию движений. При размашистом скольжении издается привлекательный звук всплеска и вокруг приманки образуются пеня, которая приводит стаи окуня в замешательство. Сильный обратный поток, создаваемый размашистым скольжением, способен привлечь окуня даже с глубины 10 футов.

El Gunfish (Pez Arma) es la mejor carnada de tipo duro en forma de lápiz lanzador (Pencil Popper) para capturar BASS activos comenzando en el verano y terminando a finales de otoño. Con un contrapeso gravitacional altamente técnico de resina de tungsteno, y proporciona una distancia de lanzamiento incomparable y un alcance amplio por medio de transmisión de masas, a las cuales los basses no pueden resistirse. Este movimiento produce un ruido llamativo de salpicaduras que permite al Gunfish burbujear y crear un estado de confusión dentro del banco de basses. El fuerte oleaje producido por la acción de patinaje tiene el poder de atraer al bass desde un máximo de 10 pies por debajo de la superficie.

This G-Splash is the popper developed by Lucky Craft Pro topwater expert Gerald Swindle. Packed full with of fish hunting spirit, this popper uses the surface like a buzz bait and has gained the nickname "Buzzing Popper". The secret of this lure is to make the bass follow it toward the surface with its continuous high-pitched splash. You can enjoy the thrill of topwater fishing where the fish are active and taking the bait just beneath the water surface.

KING OF POPという異名を持つトップウォーターの名手:ジェラルド スwindleにて開発されたポッパーがこのG-スプラッシュ。アメリカのハンティング要素を一杯に詰め込み、表層をバスベイトのように使うこのポッパーは、人知れず別名: Buzzing Popperとも呼ばれるようになる。ハイピッチでスプラッシュを作り続け、水中のバス達に表層に対する意識を付けさせる事にこのルアーの使い方の極意がある。釣れる魚はどれもアクティブで、トップウォーターゲームの醍醐味とも言える表層バイトをより楽しむ事が出来る。

Issu de la collaboration des ingénieurs de Lucky Craft et de Gerald Swindle (Angler of the Year en 2004) compétiteur du circuit pro US et grand spécialiste de la pêche de surface, le G-Splash n'est pas un popper comme les autres. La forme exclusive de la bouche du G-Splash va produire un appel particulier, très proche du « Splash » d'un poisson en difficulté se faisant poursuivre par un prédateur. Le G-Splash excelle lorsqu'on l'anime de façon violente et continue afin de simuler une chasse. Vous obtiendrez une suite de mouvements convulsifs mêlés de « Splashes » qui déclencheront des attaques foudroyantes... Tenez vous prêts !!!

Мормышка G-Splash разработана главным специалистом Lucky Craft Pro для ловли в верхних слоях воды Джералдом Свиндлом. Пропитанный духом успешной рыбной ловли, эта мормышка использует поверхность воды аналогично жужжащей приманке, за что и получила название «жужжащая мормышка». Секрет этой приманки в том, чтобы заставить окуня следовать за ней на поверхность, будучи увлечены непрерывным пропитательным плеском. Рыбак сможет наслаждаться ловлей в верхних слоях воды, где особи клюют почти на самой поверхности.

El G-Splash es el señuelo popper (lanzador) desarrollado por Gerald Swindle, el Pro de Lucky Craft experto en cebos para la superficie de agua. Diseñado completamente con el sentido de la pesca, esta cebo popper (lanzador) utiliza la superficie del agua como cebo giratorio (buzz bait) y se ha ganado el nombre de «juzjuzjuz mormyшка». El secreto de este señuelo es hacer que los basses lo sigan hacia la superficie por medio de su aguda y continua salpicadura. Usted podrá disfrutar de la emoción de la pesca sobre el agua donde los peces están activos y atacan al señuelo justamente por debajo de la superficie del agua.

# SPLASH TAIL, WAKE TAIL & KELLY J

Splash Tail 90

Wake Tail 85

New Kelly J Jr.

New Kelly J

Kelly J Jr. - 2" (60mm) 2/3oz (10.0g)  
Kelly J - 2-3/4" (70mm) 1/2oz (13.2g)

Splash-Tail 90 - 3-5/8" (92mm) 1/2oz (13.0g)  
Wake-Tail 85 - 3-1/4" (85mm) 3/8oz (12.2g)

The development concept of this splash tail was to provide a lure that can be used with a shorter consistent pitch than a stop & go lure. To realize this, it is equipped with industry's first front and back propellers containing ball bearings that can rotate from zero tension even with very long casts. The Splash Tail is made from the highest quality materials creating an efficient and effective topwater buzzing bait.

Similar to the Splash Tail, the Wake Tail comes standard with only a tail propeller. It contains ball bearings for ultra-low friction during the retrieve. The tail propeller rotates even if there is very little rod movement and the action is possible within a variety of water conditions. It has the same action as a small, weak fish floundering at the surface, which helps attract fish from long distances.

With the help of Lucky Craft pro staff member Kelly Jordan, Lucky Craft has designed a new topwater lure – the Kelly J. With its deep profile and two props – one on the front and one on the back – the Kelly J looks and sounds like an aggravating baitfish, and the bass can't resist.

このスプラッシュテールの開発コンセプトは、ストップ & ゴーをよりショートピッチで確実に打てるルアー、その機能を実現するために業界初となるボールベアリング入りのペラを前後に搭載し、更にロングキャストした着水地点でもゼロテンションから確実にペラが回転し、バスに新たな引き波でアピールします。

超低フリクションを実現したボールベアリング入りのペラを搭載した第2弾。まるで弱った小魚が水面で閃くようなアクション。その機能を生かして偉大なロッドアクションでも確実にテールのペラが回転し、ヒットゾーンが少ないオーバーハングの下や低活性時にも移動距離を抑えた状態でのアクションを可能にします。

Le Splash tail et le Wake tail font partie de la nouvelle génération de leurre de surface développée par Lucky Craft. Le Splash tail et le Wake tail utilisent en complément d'un buzzbait lorsqu'il faut marquer des pauses pour déclencher l'attaque des prédateurs. Pour cela, le Splash tail et le Wake tail sont équipés d'hélices montées sur roulement à billes, ce qui leur confère une rotation plus douce et plus longue. Même après une tirée, les hélices continuent à tourner alors que le leurre est à l'arrêt... un piège redoutable pour les carnassiers en chasse.

Этот хвост был разработан с целью создать приманку, которая издала бы более краткий последовательный звук, чем приманка, движущаяся рывками. Для этого она оснащена первыми в отрасли передними и задними винтами на шариковых подшипниках, которые могут начать вращаться даже при нулевом натяжении и дальнейшем забрасывании. Изготовленный из высококачественных материалов, Splash Tail представляет собой эффективную и эффектную жужжащую приманку для ловли в верхних слоях воды.

Приманка Wake Tail во многом повторяет конструкцию Splash Tail и стандартно поставляется только с хвостовым винтом. Она содержит шариковые подшипники, обеспечивающие сверхнизкое трение при захвате. Хвостовой винт вращается даже при малом движении приманки в самых разных водах. Её Её движение напоминает барахтање мелких рыбок на поверхности и привлекает рыбу с большого расстояния.

El concepto de este señuelo de hélices para salpicar la superficie del agua fue creado para proporcionar un cebo que pueda utilizarse con un lanzamiento más corto y consistente más que con una acción de señuelo de pausa y avance. Para realizar esta acción, se encuentra equipado con hélices delanteras y traseras, las primeras en la industria, las cuales contienen rodamientos a bola que pueden rotar desde tensión cero aún en lanzamientos bastante largos. El Splash Tail (Cola Salpicadora) está fabricado con los materiales de la mejor calidad, creando un eficiente y efectivo señuelo giratorio de superficie.

Similar al Splash Tail (Cola Salpicadora), el Wake Tail (Cola vigilante) viene con una sola hélice trasera estándar. Contiene rodamientos a bola para crear una fricción extremadamente baja para que gire sencillamente con el movimiento de las olas. La hélice trasera gira aún sin existir mayor movimiento de la caña, y la acción se hace posible dentro de una variedad de condiciones de agua. Ejecuta el mismo movimiento que un pez pequeño y débil luchando por mantenerse a flote en la superficie, lo cual ayuda a atraer a los depredadores que se encuentren a largas distancias.

The original Pointer Series has a lively, powerful action with a side-to-side slide. Even though it is small, the Pointer 78 has an excellent castability and has the ability to tempt any bass. It silently enters the target and attacks unwary bass. The Pointer 100 is a bait, which has attacking power with a strong rolling action comparable to the Pointer 78. The Pointer 78 is the right choice when you're on fish and searching for strikes. When you're searching for fish, the Pointer 100 is the go to jerkbait. The Pointer 128 is the largest of the pointer series and its rolling action is the best of the Pointer series. This product is the one miracle bait for bass, trout, musky and every species of fish.

オリジナル ポインター シリーズは、躍動的な力強いアクションにて Side By Sideのスライドをする。小さくても飛距離が出て、全てのバスを乱獲する才能を秘めているのがこのポインター78。サイレントにそのスイートスポットに侵入し、油断したバスを攻撃する。またポインター100は、そのボディからマキシマイズされたそのキャストビリティにポインター78に負けない激しいローリングアクションといった攻撃力を持ったベイトである。それらの使い分けは、よりターゲットがマイクロな場合はポインター78、そのターゲットがマクロな場合は、狙ったようにバスを攻撃できるポインター 100。そしてポインター128の最大の魅力は、ポインターシリーズ一番を誇るそのローリングアクションである。バス、トラウト、マスカーなど、あらゆる魚種をこの一品で対応してしまふミラクルベイトだ。

Le Pointer - B' Freeze est un jerkbait de conception révolutionnaire. En l'aninant par de courts à coups de saion, vous pourrez admirer ses déhanchements ravageurs simulant à la perfection un poisson blessé ou agonisant. Son centre de gravité placé très bas permet au Pointer - B' Freeze de vibrer et d'osciller même quand on stoppe la récupération et que le leurre est à l'arrêt. Parmi les nombreux modèles et les couleurs du Pointer - B' Freeze, vous trouverez sans difficulté le leurre qui imite à merveille le type de poisson fourrages présents dans vos eaux. Un condensé d'action et d'imitation qui fait du Pointer - B' Freeze un grand classique de la pêche aux leurres.

Originalная продукция серии Pointer обеспечивает динамичное и мощное движение при скольжении из стороны в сторону. Несмотря на малый размер, Pointer 78 гарантирует дальнее забрасывание и привлекает любого окуня. Он незаметно атакует ничего не подозревающего окуня. Pointer 100 — приманка, прекрасно захватывающая рыбу и обеспечивающая вращательное движение, сопоставимое с эффектом от использования Pointer 78. Pointer 78 — оптимальный выбор рыбака, жаждущего резких и мощных подсеканий. Pointer 100 — рывковая приманка, захватить которую захочет любая рыба. Pointer 128 — самая крупная из серии вращающихся приманок, с ее вращательное движение лучшее в серии Pointer. Едва ли можно вообразить себе приманку, которая больше подойдет для ловли окуня, форели, масинонга и любой другой разновидности рыбы.

La Serie Pointer original produce un movimiento atractivo y poderoso, deslizándose de un lado a otro. Aunque es pequeño, el Pointer 78 tiene una excelente capacidad de lanzamiento y tiene la habilidad de atraer a cualquier tipo de bass. Ingresa silenciosamente en el objetivo y ataca a los basses incautos. El Pointer 100 es un cebo que cuenta con un poder de atracción realizado por medio de un fuerte movimiento giratorio comparable al del Pointer 78. El Pointer 78 es la opción perfecta cuando vaya a localizar zonas de pesca. Cuando ande en busca de peces, el Pointer 100 es el jerkbait perfecto. El Pointer 128 es el más grande de la serie Pointer y su movimiento giratorio es el mejor de la serie Pointer. Este producto es un señuelo milagroso para atraer basses, truchas, lucio rayado y demás especies de peces.

Die originale Pointer Serie ist durch eine lebhaft, kraftvolle Aktion charakterisiert, die von Seite zu Seite gleitet. Wenngleich klein, lassen sich mit dem Pointer 78 ausgezeichnete Wurfweiten erzielen und man kann mit diesem Köder jeden Barsch anlocken. Der Köder nähert sich lautlos seinem Zielobjekt und greift dann den ahnungslosen Barsch an. Der Pointer 100 ist ein Köder, der - verglichen mit dem Pointer 78 - mit stark rollender Aktion angreift. Der Pointer 78 ist die richtige Wahl, wenn Sie sich bereits an einer fischreichen Stelle befinden und nun angreifen möchten. Sofern Sie jedoch noch nach Fischen suchen, eignet sich der Pointer 100 als Jerkbait. Der Pointer 128 ist der grösste Köder der Pointer-Serie. Hierbei handelt es sich um einen echten Wankerköder welcher auch schon von verschiedenen Fischmazzinen Auszeichnungen erhielt. Extrem fängig auf Barsche, Forellen, Zander und Hecht.

The small, fat body makes the Original Pointer an ultimate bait for big fish in a break area.

The Live Pointer, which generates soft twitching movements, is perfect in a small target area where you know there are fish that simply haven't been biting.

The Slender Pointer, with its excellent castability and three hooks, achieves a high hooking rate, and is thus ideal for mounting an indiscriminate attack on a school of fish in a wide, flat area.

The Lucky Craft Pointer 48 has a great action and strong vibration during the retrieve, even through a strong current. For Trout, Perch, Crappie, Bluegill or any other small pan fish, this lure is one of the best on the market.

48

The solid body allows a unique action to be produced that would simply not be possible with moulded plastic products.

WOOD

The compact bait is a stable performer that maintains its balance in various waters, including stillwater areas in lakes and slow currents in backwaters. It's a must-have when fishing for trout and "hoverers."

65

The strength of the treble hook and plastic body gives a hook up rate comparable to a swim bait, while the screw of water produced from the "live" body stimulates all varieties of fish.

Live

The secret of Pointer 78, which never fails to produce results even in the pre-spawning season and high-pressure areas, is its silent specification. The compact, fat body is the reason many big bass are attracted to this bait.

78

The Slender Pointer achieves the maximum possible castability by using the Lucky Craft's unique weight transfer system.

Slender

Pointer 100 has the longest cast in the Original Pointer Series. It also boasts the highest winning rate in tournaments. The sweet-size bait is the choice of anglers throughout the world.

100

The Pointer Deep Diver's large body produces a unique action when it is strongly jerked in the 6-7ft. zone.

90

Although it isn't widely known, Pointer 128 is a "secret" bait that has been used by competitive pro anglers. This is the only bait of this size that lets you cast sideways with pinpoint accuracy.

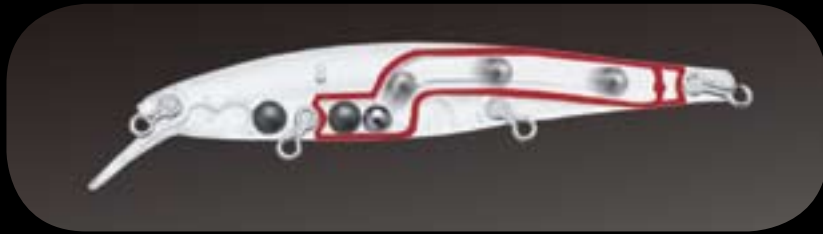

128

WHAT'S POINTER 128?

The primary appeal of Pointer 128 is its rolling action, which is the best in the Original Pointer Series. It's a miracle bait that can single-handedly manage bass, trout, musky and various other kinds of fish. The lightness of the jerking action is surprising, giving the 128's large body, but the 128 continues to jerk for a long period without losing its rhythm even one bit. Its big, wobbling force attracts bass from considerable distances.

TOP 10 COLOR

MAXIMUM CASTABILITY

As evident from the figure shown at left, the maximum specific-gravity balancer—the secret of the superior balance achieved by the Slender Pointer Series—is used to shift the center of gravity. The center of gravity is shifted as far as possible toward the rear to achieve the world’s longest cast among jerk and suspension baits of equal size. To maximize the effect of gravity-center shift and consequently the cast, the design is optimized to a minimum. No wonder this Slender Pointer is your best partner in attacking fish in a wide area.

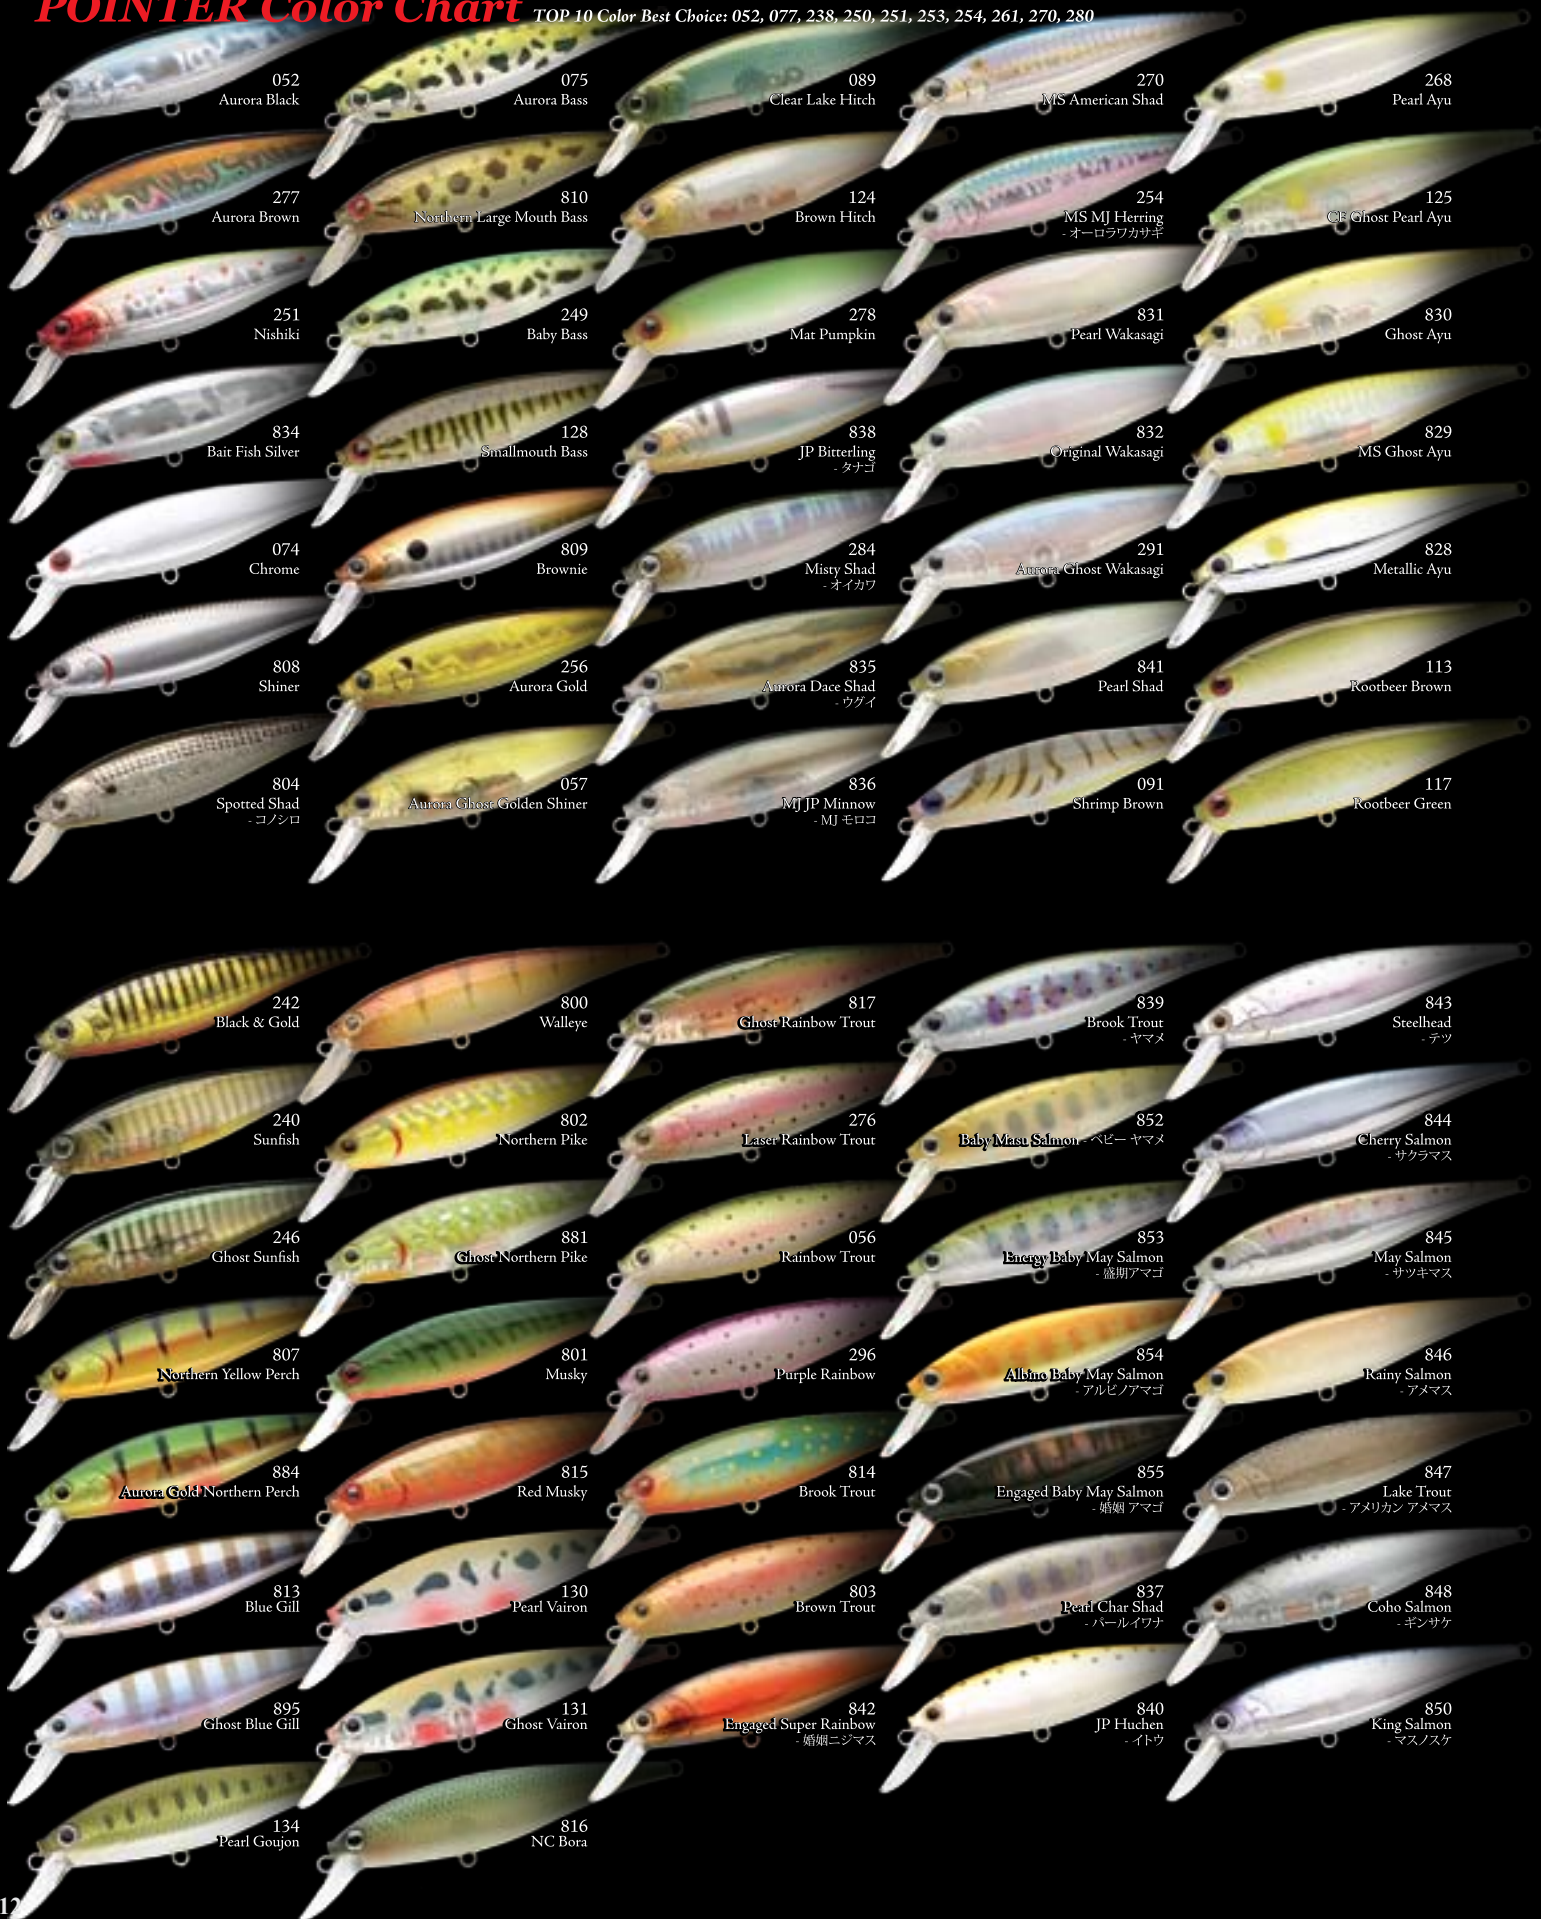

Equipped with a balancer that maximizes the bait’s low center of gravity, the Original Pointer embodies powerful rolling action. As you feel the strong vibration through your hands, you’re assured of the quick, sharp motions of the bait. Its swimming depth is the deepest among all short-bill jerk baits. The Original Pointer is a must-have in power fishing using a jerk bait. Contrastingly, because of its focus on cast through gravity-center shift, the rolling action of the Slender Pointer is not as quick and sharp as that of the Original Pointer. However, its slender body and ultimate balance embody radical action with a very wide sliding range that attracts fish from further away. In a way, the Slender Pointer is your only choice in finesse fishing under a tough condition.

ラッキークラフトが誇る万能ミノー。重心移動から繰り出される圧倒的な飛距離と、ジャークした時に作り出すスーパードレッシングは業界No.1。トゥイッチ、シヤーク、リップリング、ただ巻き、全てのリアクションで戦わせるのも思いのまま。またアフターズボーリング時のフラットエリアに生息するバスや、リバーチャンネルのトラウト、そして湾を回遊するシーバスなどにも良く、その対象魚の広さがこのルアーの特徴。ラッキークラフト社が設立されているイロンクセラーの一つとして欠かせないアイテムがこのフラッシュミノーだ。

Considéré comme la référence en la matière, le Flash Minnow est un jerkbait peu plongeant qui constitue une arme redoutable pour la prospection des zones peu profondes. Equipé d'un système mobile de transfert de masses, le Flash Minnow se lance à merveille avec précision et distance, même par vent de face. En l'animent par des petits coups de scion assez sec, canne basse, vous obtiendrez une nage inédite à la limite du retournement, en faisant miroiter ses flancs dans toutes les directions. En stoppant la récupération, vous constaterez même que le Flash Minnow vibre et oscille sur place, imitant à la perfection un poisson en difficulté. Vous verrez alors que les plus gros carnassiers ne se font pas prier face à une proie si facile. C'est pour cela que le Flash Minnow est devenu une référence dans la pêche aux leurres. Un leurre indispensable dans votre boîte.

Компания Lucky Craft представляет универсальную приманку Flash Minnow. Неправильное расположение центра тяжести, достигаемое за счет смещенного центра тяжести, и характер скольжения при рывках являются лучшими в отрасли. В распоряжении рыбака дерганье, рывки, резкие толчки и наматывание — полный набор движений, перед которыми не устоят ни одной рыбе. Отменные характеристики приманки позволяют ловить с ее помощью самых разных рыб, например окуня, пребывающего на мелководье после нереста, форели в речных каналах и морского окуня, перемещающегося в заливах. Flash Minnow — непревзойденный атрибут любой рыбной ловли, который производится Lucky Craft с момента образования компании.

Lucky Craft proudly presents the versatile Flash Minnow. The unparalleled casting distance produced by the shifting center of gravity and the skating action when jerked are number one in the industry. Twitching, jerking, ripping and reeling with all the movements that make it irresistible to fish. This lure's characteristic is suitable for a wide variety of fish such as bass inhabiting flat areas after spawning, trout in river channels and sea bass migrating in gulfs. The Flash Minnow is a must-have item and has been on sale since Lucky Craft was established.

- Flash Minnow Tr 95 - 3-3/4" (95mm) 5/16oz (8.5g)

Lucky Craft presenta orgullosamente al versátil Flash Minnow. La inigualable distancia de lanzamiento que se produce debido al centro gravitacional que se desplaza y al movimiento de oscilación al moverlo son lo que lo convierten en el número uno en la industria. Los tirones, jalones, tambaleo y oscilaciones son los movimientos que los peces encuentran irresistibles. Esta característica de la carnada se acomoda a una amplia variedad de peces, tal como los basses que habitan en áreas planas después de desovar, las truchas en los canales de los ríos y las lubinas que emigran en los golfos. El Flash Minnow es un cebo con el que debe contar y ha estado a la venta desde que Lucky Craft fue establecido.

The Staysee was produced to creep towards bass with a pumping retrieve, pausing for a long time to irritate them during the spawning season when females are still protecting their young. The suitability of the Staysee for slow fishing achieved by a pumping retrieve comes from the tight rolling action produced from the beautiful body shape and lip angle. Only the Staysee makes it possible to get close to and attract bass in medium shallow water without causing alarm through its detailed vibration and biomechanical movement.

スポーニングシーズンのまだメスがナーバスにベッドを守っている頃、ボンピングリトリブにてバスのもとに忍び寄り、長いボーリングにてバスをイラつかせる為に作られたのがこのステイシー。ステイシーがボンピングリトリブなどによるそのスローな釣りに適しているのは、その美しいボディ形状とリップアングルから作り出されるタイトローリングなアクションにある。細やかなそのハイプレーションでメディアムシャローのバスに危機感を与えず近づき、バスの生物学的な動きに合わせて稼働せしめ持ち込む事が出来るのはこのステイシーでしか出来なない技だ。

Apparu en 1995, le Staysee est le premier « longbill minnow » suspending apparu sur le marché européen. Le Staysee excelle dans l'art du « stop and go » quand les conditions sont difficiles (eau froide et début de saison). Parfaitement suspending à l'arrêt, le Staysee va vous prouver l'efficacité des pauses pendant l'animation. L'atraque se produit souvent après la pause lorsque que le Staysee se désaxe lors du redémarrage. Sa longue bavette, son profil allongé et sa section platôt ronde vous garantissent un accès rapide à des profondeurs importantes et un frémissement assez ample, sans fortes vibrations.

Équipé du système mobile de déplacement de centre de gravité, le Staysee se lance facilement à grande distance et avec précision même par temps venteux.

Серия Slender Pointer отличается привлекательным резким скольжением и дальним забрасыванием. Максимально возможное расстояние забрасывания достигается в серии Slender Pointer за счет уникальной системы переноса веса от Lucky Craft. Slender Pointer отлично подойдет для ловли малоактивной рыбы, например находящейся под воздействием холодного фронта или в ожидании перепада. Slender Pointer отличается более размашистым и беспорядочным движением, чем продукция серии Pointer. К тому же Slender Pointer всех трех размеров стандартно комплектуется тремя тройными крючками.

El Staysee fue producido para acercarse sigilosamente hacia los basses con un bombo de recuperación, parándose por un periodo largo para irritar a los peces durante la temporada de desove cuando las hembras todavía se encuentran protegiendo a sus crías. La adaptación del Staysee para la pesca lenta se logra por medio de recuperación por tirones que infiere una acción giratoria fuerte producida por su perfecta forma y ángulo del extremo. Solo el Staysee hace posible acercarse de esta manera y atraer a los basses en aguas de mediana a poca profundidad sin causar agitación por medio de su vibración detallada y movimiento biomecánico.

## LUCKY CRAFT Big Bait & Swim Bait

This model has an overwhelming presence, with a body that irritates and stimulates various fish under almost any conditions. The flashing effect creates irregular reflections of light, which adds to the lure's appeal. An angler can use standard props and blades to choreograph a different set of irregular reactions.

BullFish - 4" (100mm) 2oz

Snap Kick - 4-1/2" (115mm) 5/8oz (16.5g)

Real California 130 Premium - 5-1/2" (136mm) 1-1/4oz (36.0g)

圧倒的存在感を示すこのビッグボディ。いかなる状況でもさまざまな魚種をイラつかせ、刺激します。大きな引き波で広範囲の獲物を魅了し、フラッシング効果で広範囲の獲物はより一層のアピール力を発揮します。標準装備のフロッピーブレードなどで、異なるイレギュラーなリアクションを演出し、これで貴方もモンスターバイト必獲は間違いなし。

Le corps du BULL est énorme et donne à ce leurre une flottabilité et une stabilité exceptionnelle. Le BULL est un leurre de surface qui déplace énormément d'eau en produisant dans son sillon un « V » très attractif. Il fait réagir les carnassiers et qui capte leur attention des carnassiers à très grande distance. C'est pourquoi le BULL excelle en tant que leurre de recherche ou de localisation des poissons. Il est donc particulièrement adapté pour les grands plans d'eau. Le BULL est fourni avec deux éléments de customisation interchangeables : une hélice montée sur roulement à bille ou une palette. On peut ainsi personnaliser son BULL et proposer aux carnassiers différentes présentations.

Lucky Craft has entered the premium swimbait market with the Real California 130 Premium. This lure takes Lucky Craft's research and technology to another level. The swimming action and liveliness of this lure is second to none. Lucky Craft has spent a tremendous amount of time focusing on eye placement, fin position and body action of the 130 to make it one of the most realistic swimbaits on the market today. The weighting system was intricately designed to match the weight of a live fish. The jointed swimbait is 136mm or 5 1/2 inches long and will be available in ten of Lucky Craft's ultra realistic colors.

リアルカリフォルニアシリーズに新たにラインナップされ、リアル最終形とも呼べるのがこのプレミアムシリーズ。「魚の骨格から作り上げる」をコンセプトにその魚の持つ骨格、筋肉のつき方を研究した上で泳ぎ、姿を表現。実際に死んだ魚から型取りしたものは内臓の潰れに加え、体表のヌメリが上手く表現出来ない、これではプレミアムシリーズで目指す「魚の生きている姿には遠のいてしまう。そこで、健全な魚を持つ骨格、筋肉を内面から描き、データ化していくことでこのプレミアムシリーズは「生きている魚」を表現しています。魚の本能を刺激するベイトフィッシュの見た目+泳ぎを忠実に再現するプレミアムシリーズ、第1弾「あまご」、さらに続いてレインボートラウト、ウォールアイ、ノーザンハイク等様々なベイトフィッシュもラインナップ予定。

Lucky Craft confirme sa position de leader sur le marché du swimbait avec le Real Bait Premium « Amago ». Ce leurre place la recherche et l'innovation de Lucky Craft à un niveau encore supérieur. L'action de nage et le réalisme de ce leurre sont sans pareil. Le placement de l'œil, la position des nageoires et le dessin du corps : tout a été pensé par Lucky Craft pour créer l'un des swimbaits les plus réalistes du marché. Le positionnement des masses a été spécialement conçu afin de reproduire exactement celui d'un poisson vivant. Ce swimbait articulé en 3 pièces mesure 136mm pour 35,5g et se décline en 10 couleurs ultra très réalistes.

# REDEMPTION

When 2007 Bassmaster Angler of the Year, Skeet Reese, set out to produce the ultimate spinnerbait, he had to look no further than his own backyard. Together, Reese and Lucky Craft designed a unique spinnerbait incorporating Lucky Craft's key engineering techniques and creative elements. Out of this spinnerbait dream comes the Redemption Series, one of the most exciting products to come from Lucky Craft in recent years. The Redemption Series is cutting-edge crankbait technology in a premium spinnerbait, and with Reese's ideas and Lucky Craft's engineering prowess, the high-performance, unique Redemption Series was born. The Redemption Spinnerbait has internal tungsten components, a sleek body design featuring Lucky Craft's realistic colors, and bodies that mirror the most popular Lucky Craft crankbaits. Several versions will be available, including rattling and silent types, spinnerbaits with straight and bent wires for reaching various depths, and multiple sizes.

Quand Skeet Reese, « Pêcheur de l'année » 2007 du Bassmaster, s'est mis en tête de concevoir le Spinnerbait ultime, il n'avait pas à chercher bien loin pour trouver de l'aide. Ensemble, Skeet Reese et Lucky Craft ont créé un Spinnerbait unique incorporant le savoir-faire technologique et innovant de Lucky Craft. À partir de ce désir de créer un nouveau Spinnerbait, la série des Redemption est née, un des produits les plus intéressants développés ces dernières années par Lucky Craft. Se servant des techniques de pointe utilisées pour les Crankbaits, des idées novatrices de Skeet Reese, et des prouesses technologiques de Lucky Craft, la série Redemption est née. Composant interne de lestage en Tungstène, corps brillant en plastique combiné aux couleurs réalistes Lucky Craft le rendent unique en son genre. Plusieurs versions vont être développées, incluant des Spinnerbaits bruyants ou silencieux, à armature droite ou coudeuse pour prospecter différentes profondeurs et enfin déclinés en différents grammages.

ラッキークラフトUSAのプロスタッフであるスケート・リースが今年考案したのがREDEMPTIONシリーズ。そのテーマと言うべきコンセプトには、20代で初、まさにゼロからのスタートを切り、20年目にして名実共にトップアングラーまで上り詰めたまでの涙と苦悩が滲み伝わる彼の人生そのものが表現されている。彼がその20年のキャリアの中で極めたフィッシングパターンは、現在の俗語で言う「ジャンク フィッシング」、つまり、必要とあれば何処でも何でも使いなしなから、それなりの釣果を残す為の釣り技術だ。そんなジャンク フィッシングのパターンの中でも、クランクベイトの次に依り度の高いうルアーがスピナーベイトである。この必要最低限度のコンタクトサイズに、よりコンディションのいいバスを捕獲する為の知恵と経験が山盛り込まれています。そんな彼の個性と人生観がふれるこの商品をお楽しみください。

# LUCKY CRAFT PERFORMANCE ROD

*t.l.c.*  
collection

Born through many years of research, the TLC Collection is a family of rods designed to let you tackle any situation with ease. TLC stands for "Team Lucky Craft," signifying the collection has been designed by a group of professional anglers contracted by Lucky Craft for rod development.

The cranking rod series is made of cutting-edge fiberglass offering good castability and a soft/flexible tip that reduces the number of missed bites while ensuring a light and sensitive response. These rods are not only sensitive but also provide the strength needed to drive "power cranking."

The graphite-based rods, such as the Sammy, Pointer, Staysee and LVR, reflect the team's persistence in developing superior products. These rods were created with the features of hard baits in mind and are designed to effectively handle more rod work and action than their cranking counterparts.

No special explanation is necessary for the drop shot and flipping rods. Understanding the unique characteristics of these rods comes only when you have learned to use them selectively in different situations. The strong blanks, which do not falter in the face of ferocious predators, are yet to be rivaled. The Team LC rods continue to evolve as they reflect the expanding skills and knowledge of our professional advisors. Try them and see for yourself!

# LUCKY CRAFT SALT WATER ISG ~In Shore Game~

In-shore fishing can be an exciting sport when the right baits are available. The "In-Shore Game" (ISG) series was developed to catch in-shore species such as redfish, sea trout, snook, founder and tarpon. When fishing in-shore, the water and conditions are different when compared to freshwater fishing, but so are the species of fish. One main difference stands out above the rest – the weight of the fish being caught. In-shore game fish are usually much heavier than bass, which calls for a different type of lure.

The ISG series of baits is the answer to the complex needs of in-shore fishing. The lures are designed to combine the delicate movements and finesse of freshwater fishing with the powerful techniques of saltwater fishing. Delicate movements are still appropriate when casting, but once the hook is set, powerful tackle is needed. The combination of these opposite design elements creates an exciting atmosphere when fishing in-shore.

ISG Gunfish 95 - 4" (95mm) 3/8oz (12.0g)

ISG G-Splash 80 - 3" (80mm) 3/8oz (12.0g)

ISG Sammy 100 - 4" (98.5mm) 1/2oz (13.6g)

ISG Pointer 100 - 4" (100mm) 5/8oz (16.5g)

ISG Fat CB SSR - 3" (75mm) 5/8oz (18.0g)

ISG Fat Mini SR - 2" (50mm) 3/8oz (8.8g)

ISG Fat Mini D-5 - 2" (50mm) 3/8oz (8.8g)

# LUCKY CRAFT SALT WATER CIF ~California InShore Fishing~

The California In-shore Fishing (CIF) series was developed for use in limited areas in California where in-shore fishing is enjoyed. In the Bay Area, for example, in-shore fishing is more prominent, and species such as sand bass, spotted bay bass and calico bass can be caught. In addition to recreational in-shore fishing, the CIF series is designed as a formidable partner for those taking part in the Salt Water Bass Anglers (SWBA) tour.

Lucky Craft's Green Head Chartreuse color is very popular in Newport Beach, and the shrimp color – SD Killer Shrimp – is favored in San Diego. As for in-shore fishing in other areas of California, don't forget species such as barracuda, halibut and mackerel. When fishing for barracuda or halibut, the Flash Minnow 110SP in the Metallic Sardine color demonstrates the power of both the lures and color combinations from Lucky Craft.

CIF Sammy 115 - 4 1/2" (115mm) 5/8oz (18.5g)

CIF Sammy 128 - 5" (128mm) 1oz (28.0g)

CIF FlashMinnow 110SP - 4 1/2" (110mm) 5/8oz (18.0g)

CIF FlashMinnow 130MR - 5 1/4" (130mm) 3/4oz (20.0g)

CIF Pointer 100 - 4" (100mm) 5/8oz (16.5g)

# LUCKY CRAFT SALT WATER OSG ~Off Shore Game~

The "Offshore Game" (OSG) series was developed specifically for catching offshore game fish with a cast-and-retrieve technique. Similar to the "Offshore Trolling" (OST) series because of the offshore fishing element, the key difference is the OSG series is not suited for trolling offshore. Because you're targeting fish species such as dolphin, red snapper, yellowfin tuna, wahoo and amberjack, the tackle must be durable and strong to withstand the hook-set of such powerful fish. The OSG series is a must-have if you want to experience the power of the offshore environment.

Off Shore Gameと題されたこのOSGシリーズは、Off Shoreで行われるキャスト＆リトリフゲームに対して真剣に開発された商品です。Off Shore Gameに代表される対象魚として、Dolphin、CT、Red Snapper、Yellowfin Tuna、Wahoo、Amberjackなどがあげられるが、完全なるOff Shoreでのウルトラ パワーフィッシングを確立する為のタックルです。これらの超重量級のターゲットフィッシュを、しかもキャスト＆リトリフで攻略するとなると、長時間のキャスト＆リトリフに耐えられるタックルの軽量化と、超パワーフィッシングに対応する為のタフさといったタックル開発において相反する具材を、より高い水準にて具現化された幻のルアーである。

La série "Offshore Game" (OSG) a été spécifiquement développée pour la pêche au lancer des barracudas, pelamides, liches, sérioles et poissons tropicaux. En plus de la distance de lancer, la durabilité et la solidité des leurres sont les points essentiels sur lesquels les concepteurs de la série OSG ont travaillé. Ces leurres vous permettront d'affronter en toute confiance les attaques et les ruses les plus sauvages de ces poissons surpuissants. Les leurres de la série OSG allient le savoir faire de Lucky Craft en matière de conception de leurre à une solidité à toute épreuve.
